

The Sienna

Gold Abstract Face Statue

Thank you for bringing The Sienna home. A good piece lasts for years when it gets a little regular attention, and none of it takes much effort. This guide covers what I would do to keep yours looking the way it did on day one.

Marc, Founder

EVERYDAY CARE

- Dust weekly with a soft brush, including the details around the face.
- Finish with a dry cloth. Light pressure is enough.
- Keep it out of long, direct sunlight, which can fade hand painted gold.
- Keep it dry.

CLEANING, STEP BY STEP

- 1 Use a soft, clean brush to lift dust from the contours of the face.
- 2 Wipe over the surface with a dry microfiber cloth.
- 3 For marks, dab with a barely damp cloth rather than rubbing.
- 4 Dry right away with a clean, dry cloth.

PLEASE AVOID

- Scrubbing, which can rub away hand painted finishes
- Household sprays, bleach, and ammonia. Strong acids and alkalis both attack aluminum
- Hours of direct sunlight
- Water, rinsing, or soaking

PLACEMENT AND HANDLING

- Lift from the base with both hands.
- Aluminum is light and easy to knock over, so choose a stable spot.
- Add a felt pad underneath to protect your surface.

GOOD TO KNOW

Because each piece is hand made and hand painted, brushwork and tone vary slightly. Yours is its own.

LARES · HOME

In ancient Rome, the Lares were the guardians of the household. We took the name because a home should feel looked after, and so should the things in it.
